As community and corporate leaders, we are all responsible in the effort to enhance and improve educational opportunities. As we do so, schools achieve success, communities are stronger, and businesses succeed. The *Community Learning Partnership of Greater Miami Shores* (CLP) believes our schools, universities, and community leaders play a critical role in the development of student leadership skills necessary for personal and social responsibility. Teachers, faculty, parents, and communities make these opportunities happen for our nation's youth.

On February 18th, 2011, the CLP will host a Conference designed to share knowledge and resources within our community and create opportunities for interaction among local educators. The Conference, titled *At the Heart of 21st Century Learning*, will highlight common issues and emerging trends in K-12 education.

Conference Format: The conference features a keynote presentation by *New York Times* Best Selling author Dan Pink, followed by a conversation with Dan Pink, moderated by Helen Aguirre Ferré, WPBT 2 host of *Issues* and Op Ed editor at *Diario Las Americas*.

Over 30 afternoon breakout sessions will be offered by area public, private schools, and university faculty. Each session will present critical issues in K-12 education and create opportunities for dialogue and discussion regarding best practices in our community. Interested educators, parents, community, and corporate leaders are encouraged to attend.

Dan Pink is the author of two bestselling books on the changing world of work. In his latest book, *Drive: The Surprising Truth About What Motivates Us*, Pink shows us that the secret to high performance and satisfaction in today's world is the human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. In *A Whole New Mind: Why Right-Brainers Will Rule the Future*, Pink charts the rise of right-brain thinking in modern economies and describes the six abilities individuals and organizations must master in an outsourced, automated age. Educators across the country have embraced Pink's theories as holding the key to meeting the needs of the 21st century learner.
