**CITY OF HOLLYWOOD FIRE RESCUE AND BEACH SAFETY DEPARTMENT IN CONJUNCTION WITH BARRY
UNIVERSITY HOLD HARMLESS AGREEMENT FOR THE TRAINING CENTER**

I, _____, the undersigned do hereby request permission from the City of Hollywood Fire Rescue and Beach Safety Department and Barry University to participate in the Physical Agility Test (PAT) at the training facility located at 3400 North 56th Avenue, Hollywood, Florida. I hereby understand that this training will include but not be limited to rigorous physical functions and ability tests. I hereby agree to obey at all times all instructions, orders, and commands given to me by the instructors conducting the training and tests. I fully realize and appreciate the possibility that I may be exposed to the danger of physical harm or injury. I nevertheless freely and voluntarily accept these risks.

Wherefore, in consideration of being granted permission to participate in the City of Hollywood Fire Rescue and Beach Safety Department and Barry University Physical Agility Test (PAT), I hereby personally assume all risks in connection with such Activities and the program, and I further release the City of Hollywood and Barry University, and its instructors from any harm, injury, or damage which I may sustain while performing and participating in the training and related activities, whether foreseen or unforeseen, and further to save and hold harmless said parties from any claim by me, or my family, estate, heirs, or assigns arising out of my said activities and participation in the program.

I further state that I am of lawful age and legally competent to sign this affirmation and release, that I understand the terms herein are contractual and not a mere recital, and that I have signed this document of my own free act. I further acknowledge that I am familiar with the contents of this affirmation and release.

IMPORTANT REMINDERS

- Academy PAT test starts at 7:30 am
- Students MUST have photo ID to test
- Wear Appropriate clothing
- Bring a towel
- Bring water and a snack

ACADEMY PHYSICAL ABILITY TEST (PAT)

Barry University Fire Academy Physical Ability Test (PAT) is based upon a comprehensive job task analysis, these determined tasks that are deemed critical, ones performed frequently by firefighters.

The On-Target Combat Test was developed by Paul O. Davis, PhD and Charles Dobson, PhD of ARA/Human factors, Inc. This validated job simulation test is used to objectively measure firefighter's performance. The tasks are performed sequentially, and accurately reflect the metabolic demand imposed on a firefighter during actual emergencies.

ARA/Human Factors, Inc. have monitored heart rate responses and pulmonary requirements for these and other firefighter activities. Not all fires are the same, and it is possible to anticipate every emergency scenario. However, a firefighter who can complete the tasks listed below within the recommended time frame possess the level of fitness necessary to meet most emergency demands.

The On-Target Combat Task test is done wearing a 22-pound weighted vest on. The events are done sequentially and must be completed within 8 minutes. The clock does not stop until all five events are completed. However, a candidate should pace Him/Her self and no running is allowed at any time during the entire test.

This ability test is designed so a candidate must walk at all times.

AUTOMATIC FAILURE WILL OCCUR IF:

1. The 8-minute time frame is exceeded. At this point, the clock will stop and the test is completed for that individual.
2. Equipment is abused by unnecessarily dropping a nozzle, hose, or sledgehammer on the ground. All equipment shall be properly set on the ground.
3. Failure to comply with specific instructions given by the staff of the Barry University Fire Academy.
4. Unauthorized stops are made.

ON-TARGET COMBAT TEST:

TASK-1 High-rise Stair Climb Evolution

Start at the base off the stairs on the ground. The High-rise hose pack shall be place on the left shoulder. The free right hand is to be used on the handrail for balance only.

NOTE: The handrail cannot be used to pull yourself up or pivot around landings.

Contact must be made with every step. Do not skip a step ascending or descending. The hose pack must be deposited on the fifth-floor landing. At the top of the fifth-floor landing lay the hose down and proceed over to TASK-2 Hoist Evolution. Once completed return to the fifth-floor landing and pick up High-rise hose pack and continuing back to the ground.

TASK-2 Hoist Evolution

At the fifth-floor landing walk over to the edge of the roof and grab the rope. Stand behind the red line and use a hand over hand method to pull the rolled 2 ½ inch SO-foot hose to the top of the railing. Walk forward, lift the hose of the hose roller, and place it on the floor.

NOTE: Do not place your feet on the wall or railings - Stay away from the edge when pulling rope.

Return to fifth-floor landing, pick up High-rise hose pack, place it back on your left shoulder, and continue down the stairs to the ground.

TASK-3 Forcible Entry Evolution

Position both feet on the diamond plate so your toes are even with the weighted slide. Bend forward so you can see the end of the slide at all times. With a ten-pound sledgehammer, using short hard strokes, drive the slide to the other end and the instructor will advise you once you have reached that end.

NOTE: The body must be kept in the bent forward position and the eyes on the target at all times. The hammerhead cannot be raised higher than the 10 o'clock position, and the hands must not move on the hammer handle.

Carefully set the hammer down and proceed to the Hose Advance Evolution.

TASK-4 Hose Advance Evolution

Pick up the nozzle and place it over either shoulder and drag a charged 1 $\frac{3}{4}$ inch hose line straight forward 75 feet. The evolution is finished when the nozzle completely crosses the line between the cones. If you should slip, get up and continue.

NOTE: Hands should be placed on the hose or coupling, not the nozzle and the nozzle should not hit the ground.

Once you cross the finished line, place the nozzle on the ground and walk over to the Victim Rescue Evolution. Automatic failure will occur if the nozzle is dropped to the ground.

TASK-5 Victim Rescue Evolution

Grab the hose that is attached to the 175-pound victim and drag it, walking backwards only, 100 feet to the marked finish line. Your test is completed when the victim completely clears the finish line.

NOTE: If you slip, get up and continue.
